

CUSTOM ORTHOTICS OF LONDON INC.

PATIENT-CENTERED OUTCOME DRIVEN HEALTHCARE

Custom Orthotics of London Inc. provides the highest level of care for our patient with a focus on improving quality of life through intervention with orthotic services. Changes in healthcare and insurance regulations require us to measure and report on the effectiveness of the care that we provide, requiring more measures and documentation than before.

We are implementing “Best Practice” which focuses on providing a patient-centered approach. Our goal is to better understand your rehabilitation needs and goals so that we can more effectively communicate and coordinate treatment plans between you and other members of your healthcare team, such as physicians, physical therapists and rehabilitation counselors.

In order to better measure and improve your clinical outcomes, we may ask you to participate in various “outcome measure tests” which could include surveys or physical performance measures that help us to quantify starting points and improvement in your rehabilitation and overall well-being.

Feel free to ask your clinician if you have any questions throughout your care experience here at our practice.
